---

Hi Sarah,

We have reviewed your project description for the below activity and can confirm that you do not need a land use permit from this office.

Should you have any questions, please let me know.

Lee Ann

Hi again Lee Ann,

Yes, it has been confirmed that there will in fact be an overnight component at each location.

Can you please advise if we will need a land use license?

Sarah

Hi Lee Ann,

Thanks for your call. I wanted to just review the details of the AOA course b/c it didn't make sense that they weren't camping at these locations, given the equipment they are using. I have found a discrepancy in the applications I received for each site versus the Detailed Description provided, with the latter stating that:

“The final choices of community were based on recommendations from the Rangers as to their availability and capacity to support the training. It is also intended that different communities will be used in different years to increase opportunity, but this is not always possible. Under normal circumstances, the students and Rangers will remain within a 100km radius of each community and always under guidance from the local Rangers. Given the novice skills of the students, the nature of the training and the potential weather conditions, it is impossible to identify exact bivouac sites in advance. The establishment of a bivouac campsite will be based on the weather, terrain conditions, type of training and advice from the Rangers who are instructing the students. **These campsites will consist of a maximum of three tents and a maximum of 15 persons per night with normally four nights spent in various locations.** Each bivouac location will be photographed and the location recorded by GPS and a detailed report will be written to summarize these activities. “

I have sent an email to inquire but I suspect the errors were in the individual applications I have and that the above quote is correct. I've attached the entire document for your review – it has Op boxes, etc. for your information. I will confirm that I'm correct when I say that they will indeed be camping and then ask that you please re-evaluate and let me know if we do in fact require a land use license.

Thanks.

Kind regards,

Sarah Rahmer
