

In accordance with section 26 of the Nunavut Planning Commission's *Rules of Procedure for Public Hearings and Public Reviews*, the Commission hereby directs the following written questions to participants on issues to be considered in the hearing on the Draft Nunavut Land Use Plan 2016. For ease of reference, the Commission includes questions from the Commissioners and from other participants. Any participant may answer any question in writing, including questions directed to specific participants.

#	From:	Directed To:	Topic:	Question:
1	NPC	Government of Canada	Additional Research	Canada clarified benthic areas identified by WWF's written submissions are outside of the Commission's jurisdiction. What additional research priorities should be included in the Land Use Plan to identify benthic areas for potential consideration in future plan amendments, if any?
2	NPC	Kitikmeot Inuit Association	Additional Research	The Naonaoyoatit Traditional Knowledge Project was referred to in the KIA's written submissions. Would the KIA consider sharing its data with the Commission?
3	Hall Beach	All participants	Archaeology	There are a lot of archaeological sites, although we want to develop inside the municipality. All these things that are inside the municipality we cannot touch, because they are archaeological artifacts. Can they perhaps be recorded? We have been trying to do this, but nothing ever seems to be done about it. We run into obstacles.
4	NPC	Makivik	Areas of Equal Use and Occupancy	The Nunavik Land Claims Agreement says: "For the purposes of management regimes in the areas of equal use and occupancy, the arrangement, as outlined in section 27.6.1 of this agreement and Section 40.2.14 of the Nunavut Land Claims Agreement, shall continue to apply until agreement has been reached pursuant to Section 40.2.15 of the Nunavut Land Claims Agreement." Has an agreement been reached pursuant to Section 40.2.15 of the Nunavut Land Claims Agreement?
5	NPC	Makivik	Areas of Equal Use and Occupancy	Communities sharing Areas of Equal Use and Occupancy have supported protected area status for these islands in the Land Use Plan, however Makivik has suggesting these areas be designated Mixed Use instead. Can Makivik explain the apparent discrepancy?
6	NPC	All participants	Caribou	Is there any evidence of a connection between development on caribou habitat, whether industrial, infrastructure or otherwise, and declining caribou herds?
7	NPC	All participants	Caribou	Would seasonal restrictions allowing development and work stoppages when caribou are approaching/present be sufficient protection for caribou habitat?
8	World Wildlife Fund	Government of Canada	Caribou	The Dolphin-Union herd and Peary caribou are both SARA listed caribou which depend on sea ice crossings during their annual migrations. Does the Government of Canada endorse seasonal ice-breaking restrictions on these well documented areas supported by both scientific studies and IQ?
9	Qikiqtani Inuit Association	Government of Canada	Caribou	You were asked earlier in this Hearing whether INAC would suspend the issuance of new mineral rights in critical habitat, including calving grounds. You did not directly answer the questions so I am raising it again. Given the well-recognized and precipitous declines in herd numbers and the threatened status of many of the herds, will INAC commit to the suspension of the issuance of new mineral rights on critical caribou habitat? Yes or No.

#	From:	Directed To:	Topic:	Question:
10	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.	Caribou	Recognizing the signatories will be asked to approve or reject the DNLUP, what criteria, if any, would the signatories accept as supporting Protected Area designations where any development is prohibited, or Special Management Areas with seasonal prohibitions on development activity, for habitat such as caribou core calving and post-calving areas, key access corridors, and freshwater crossings?
11	NPC	Government of Canada; All participants	Caribou	Canada's written submission cited Anne Gunn, Kim G. Poole, Jack Wierzchowski and Mitch Campbell, March 2007, Assessment of Caribou Protection Measures, that said it found "conditions on land use intended to avoid disturbance to caribou have been partially effective and could be more effective if adapted with updated monitoring and analytical techniques". Has Canada or any other participant updated that research or conducted further research or monitoring to determine if the quality or quantity caribou habitat is affecting herds?
12	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.	Caribou	Would Canada, the Government of Nunavut, and NTI support temporary restrictions on development in some caribou core calving, post-calving, key access corridors, and freshwater crossings, to study whether there is a measureable benefit to caribou herds?
13	NPC	All participants	Caribou	Is there any evidence that mobile caribou protection measures can be effectively implemented, and if so, who would be responsible for monitoring and enforcing such measures?
14	NPC	Government of Canada; Government of Nunavut	Caribou	Are there any statutes or regulations, whether federal or territorial, that are in operational conflict with the Draft Nunavut Land Use Plan and if so, to what extent is there a conflict?
15	NPC	All participants	Caribou	Acknowledging the submissions of some participants that caribou data used to generate the DNLUP may have inaccuracies, is there a database or other repository of data on caribou and other wildlife that participants agree should be used in the Land Use Plan instead of existing data?
16	World Wildlife Fund	Nunavut Tunngavik Inc.	Caribou	Can you please re-state your position on caribou protection measures, and comment on if this position applies only to the Qikiqtani region or to all of Nunavut?
17	NPC	All participants	Caribou	Is there evidence that existing caribou protection measures are effective?
18	NPC	All participants	Caribou	Have existing caribou protection measures been significantly adapted to slow or reverse shrinking herd sizes?

#	From:	Directed To:	Topic:	Question:
19	NPC	Qikiqtalluk Wildlife Board	Caribou	The Qikiqtaaluk Wildlife Board recommends the development and implement of clear measures to provide tundra caribou with additional protection in the case of severe weather events, which may become more severe and more frequent with climate change. Do participants have any specific measures relating to tundra caribou they ask be included in the Land Use Plan?
20	NPC	Tlicho Government	Caribou	Can you elaborate on the caribou monitoring that would have to happen in order to determine if seasonal restrictions would be applicable, including who would be monitoring?
21	NPC	All participants	Caribou	The Commission has heard from many participants that there is no clear evidence that development is linked to declines in caribou numbers. The Commission values both scientific and IQ and traditional knowledge. Do you have any IQ or traditional knowledge regarding effects of development in caribou calving grounds?
22	NPC	All participants	Caribou	Can participants identify specific caribou wintering habitat where caribou are particularly sensitive to disturbance, and should be given additional protection under the Plan?
23	NPC	All participants	Caribou	Can participants provide any additional information regarding important caribou habitat, distribution, numbers and movements on Baffin Island that the NPC may not already have in its databases?
24	NSMA	NTI/RIAS	Caribou	With regard to the proposed mobile caribou protection measure, what sort of activities do the RIAs and NTI expect to be affected? For example, there are relatively low-impact exploration programs and relatively high-impact mineral mining or all-season road traffic. Would you expect there to be some exemptions o the application of the mobile protection measure?
25	NSMA	NTI/RIAS	Caribou	Of the activities that would be affected by the mobile protection measure, what sort of restrictions do RIAs and NTI envision? For example, will there be a minimum flying distance, temporary drilling ban, or temporary and complete cessation of industrial activities?
26	NSMA	NTI/RIAS	Caribou	How do RIAs and NTI envision that the mobile protection measure apply to existing developments? For example, if the mobile zone moved over to an operating mining site, would the mine be affected by the mobile zone?
27	NSMA	Government of Nunavut	Caribou	How does the GN explain the basis for their March 2016 reversal of position on protection of caribou calving and post-calving areas? How was technical input from their staff and input from community consultations used to develop this new position?
28	NSMA	Industry	Caribou	In the event that your development site overlaps with the key caribou habitats, will you commit to secede your activities, including blasting, ore processing, hauling, and flying?
29	NSMA	GNWT; WWF; BQCMB; WRRB	Caribou	In your opinion, do you believe that establishing a definitive causal link between industrial development and caribou population decline is a pre-requisite to establish a protected area for the key caribou habitats? In your opinion, how likely is it that such link may be established scientifically?

#	From:	Directed To:	Topic:	Question:
30	BQCMB	Government of Nunavut	Caribou	Can you explain the basis for GN's March 2016 reversal of position on protection of caribou calving and post-calving areas? How was input from GN-DOE and other staff and input from communities used to develop this new position? Were there consultation meetings held with the HTOs and regional wildlife boards who had previously made public statements and/or submitted their recommendations to Nunavut environmental assessment and land use planning processes in favour of protection of calving and/or post-calving areas?
31	BQCMB	Government of Nunavut	Caribou	If protected areas are not established through the land use plan for protecting the most important caribou habitats, such as core caribou calving grounds, will the GN recommend to the NIRB that no mineral exploration and mining activities be approved in these areas? If not, will the GN commit to investing substantial resources in developing a comprehensive system of mobile protection measures for exploration and mining projects across Nunavut?
32	BQCMB	Government of Nunavut	Caribou	If some form of mobile caribou protection measures are adopted as part of the land use plan or outside of the plan, will GN actively participate in further development of the measures, including testing their effectiveness? Does GN anticipate that it will have sufficient resources, both human and financial, to develop the caribou monitoring programs that would be required to establish effective mobile caribou protection measures across Nunavut?
33	BQCMB	Government of Canada	Caribou	If protected areas are not established through the land use plan for protecting the most important caribou habitats, such as core caribou calving grounds, will INAC stop permitting mineral exploration and mining activities in these areas? If not, will thresholds be established for limiting disturbance to caribou and habitat in these areas?
34	BQCMB	Government of Canada	Caribou	If the first Nunavut land use plan does not incorporate any form of caribou protection measures, not even the original measures that are included in the Keewatin Regional Land Use Plan, will INAC continue to include the original measures as conditions of federal land use permits? If so, what level of effort will be implemented for compliance monitoring and enforcement?
35	BQCMB	Government of Canada	Caribou	If some form of mobile caribou protection measures are adopted as part of the land use plan or outside of the plan, will government agencies and industry work together on further development of the measures, including testing their effectiveness? Who will pay for this work? Which agencies will be responsible for monitoring caribou distribution and compliance of industry with the measures as the caribou and mobile protection areas move between federal and Inuit-owned lands?
36	BQCMB	KivIA/all RIAS	Caribou	If protected areas are not established through the land use plan for protecting the most important caribou habitats, such as core caribou calving grounds, will KIA stop permitting mineral exploration and mining activities in these areas? If not, will thresholds be established for limiting disturbance to caribou and habitat in these areas?

#	From:	Directed To:	Topic:	Question:
37	BQCMB	KivIA/all RIAS	Caribou	If the first Nunavut land use plan does not incorporate any form of caribou protection measures, not even the original measures that are included in the Keewatin Regional Land Use Plan, will KIA continue to include the original measures as conditions of land use licenses? What monitoring and enforcement will be used?
38	BQCMB	KivIA/all RIAS	Caribou	If mobile caribou protection measures similar to those you have proposed are adopted as part of the land use plan or outside of the plan, what level of monitoring and enforcement will be required at a minimum? What agencies will be responsible for further development of the measures, including testing their effectiveness, and for their enforcement? Will project proponents, KIA and INAC, and/or GN be responsible for caribou monitoring?
39	BQCMB	KWB, Kivalliq HTOs and Hamlets	Caribou	Is it true that some Kivalliq communities are worried that protected areas established in the first land use plan to protect post-calving areas for caribou may permanently stop development of key roads with no chance of further discussion or consideration (e.g., from northern Manitoba to Rankin Inlet)?
40	BQCMB	NWT & NU Chamber of Mines	Caribou	Can you explain what evidence has been used to develop the position that existing caribou protection measures that have been used by the mining industry in Nunavut and the NWT have been effective, particularly since the GNWT's monitoring program was discontinued in 1990? This position has been stated in Chamber submissions multiple times, including in "GN's recommended caribou protection measures: Technical review" (Feb. 2016).
41	BQCMB	NWT & NU Chamber of Mines	Caribou	If some form of mobile caribou protection measures are adopted as part of the land use plan or outside of the plan, will industry work together with government agencies and the RIAs on further development of the measures, including testing their effectiveness? Will industry be willing and able to contribute financially toward GN caribou monitoring programs required to implement mobile measures? Does the Chamber expect that the measures will apply similarly to exploration and development projects?
42	World Wildlife Fund	Government of Nunavut	Caribou	What specific terms and conditions would be included in the Special Management Area designations you propose for caribou habitat? What previous studies or IQ do you have to support that these measures would be effective in safeguarding caribou?
43	World Wildlife Fund	Government of Nunavut	Caribou	You have indicated that a case by case basis is appropriate for caribou protection. The following is an excerpt from the NIRB submission in January 2017 "While impact assessment is designed to address potential impacts on a project-specific basis, land use planning is intended to address broader issues of conservation and development for various project types on a regional scale; parties <b>will not</b> be well-served if a NLUP avoids addressing required protection for caribou habitat and any associated restrictions on development in favour of continued deference to project-specific impact assessments by the NIRB." How can the Government of Nunavut reconcile this with their current position that NIRB handle development proposals on a case by case basis when the regulatory authority has indicated this is not an appropriate way forward?
44	NPC	North Slave Metis Alliance	Caribou	Can the North Slave Metis Alliance provide additional information on caribou rutting areas it asks be protected, and the source of the information?

#	From:	Directed To:	Topic:	Question:
45	NPC	Hamlets, City of Iqaluit, Nunavut Association of Municipalities	Community Plans	The Nunavut Agreement (s.11.7.4) requires cooperation between the NPC and municipalities "to ensure that regional and municipal land use plans are compatible." Are any of the proposed land use designations in the 2016 DNLUP allowing for most types of development activity within municipal boundaries incompatible with any existing municipal land use plans?
46	Jacobie Akavak, Kimmirut	All participants	Cruise Ships	Most communities have concerns about cruise ships and their tourists. They are informed about the regulations they have to follow but they do not follow them. They sneak into inlets and get too close to wildlife. Where do we take these concerns, or to who?
47	World Wildlife Fund	Government of Canada	Existing Rights	You have recommended that the plan be adjusted to reflect that any prohibitions would not apply in specific locations where there are existing mineral rights and interests. What level of existing mineral rights and interests would this apply to? Does your recommendation mean that a prospecting permit in a caribou calving ground should be allowed to develop into a mine as a permitted use within an otherwise protected area?
48	NPC	Nunavut Tunngavik Inc.	Heritage Rivers	Can QIA provide an update on the status of consultations on the Soper River, or identify proposed conditions for inclusion in the associated Special Management Area?
49	NPC	Government of Canada; Nunavut Tunngavik Inc.	Icebreaking	Canada referred to a Canada-US treaty relating to navigation in the Northwest Passage as follows: "For example, Canada has a treaty with the United States called the Arctic Cooperation Agreement in which the Government of Canada has undertaken to facilitate navigation by US icebreakers. Any measure under the Nunavut Land Use Plan that prohibits navigation in some areas may be inconsistent with Canada's obligation under that agreement..."(Qikiqtani hearing transcript p. 249). Were Inuit consulted prior to or during the treaty negotiation, and if so, were issues such as Inuit on-ice transportation and traditional travel routes, as well as wildlife habitat and caribou crossings considered?
50	World Wildlife Fund	Nunavut Wildlife Management Board	Icebreaking	As a member of the Nunavut Marine Council, are you in agreement with the recommendation of the Government of Canada that all shipping regulations should be taken out of this iteration of the Nunavut Land Use Plan, including all restrictions on ice breaking?
51	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.; Hamlets; All participants	Impact Benefit Agreements	The Nunavut Agreement provides for both impact benefit agreements and land use planning by the Commission. One or more participants have raised the concern that the Land Use Plan would affect Inuit impact benefit agreements or make them unnecessary (see e.g. Qikiqtani hearing transcript p. 33, speaker: D. Kunuk). Under what circumstances if any could a Land Use Plan affect or interfere with impact benefit agreements? If there is little or no effect on impact benefit agreements, would that affect any participant's position on any land use designations in the Draft Land Use Plan?
52	NPC	Government of Canada; Government of Nunavut;	Inuit Access Rights	The expert report by Professor Mullan filed by the NWMB says the Nunavut Agreement in s. 5.7.18(d) makes access rights subject to projects approved by the Commission. Article 7.3.2 also refers to access rights in Article 5. How do participants suggest the Land Use Plan balance Inuit rights of access including the right to set up outpost camps with development that infringes on those rights?

#	From:	Directed To:	Topic:	Question:
		Nunavut Wildlife Management Board; Nunavut Tunngavik Inc. & RIAs; All participants		
53	World Wildlife Fund	Government of Canada	Land Use Designations	The Department of Fisheries and Oceans has recently conducted community consultations to ask communities which areas they would like to see designated as Marine Protected Areas under the Oceans Act. During this DFO MPA process, communities have expressed a consistent desire to create large MPAs and have provided DFO with a lot of information on current community values and uses. How is the Government of Canada ensuring that this information is being brought to the attention of the NPC to ensure Land Use designations reflect community interests?
54	NPC	Government of Canada	Land Use Designations	What laws, regulations, and/or international treaties preclude or limit the Land Use Plan from directly or indirectly applying to shipping and icebreaking, and where do such limits apply? Are there specific waterways that should be designated "Mixed Use" to preserve navigation, and what waterways if any can be designated "Special Management" or "Protected" to preserve Inuit on-ice travel and wildlife habitat?
55	NPC	Hamlets	Land Use Designations	The 2016 Draft Nunavut Land Use Plan uses three types of land use designations with increasing levels of protection for lands. Both "Mixed Use" (MU) and "Special Management Area"(SMA) permit development (MU without restriction, SMA may restrict some uses and activities). The third type of land use designation is "Protected Areas" that prohibits any development of land that is incompatible with environmental protection and cultural priorities for land uses. Do communities support the proposed land use designations in the areas they use, or request changes to proposed land use designations in the areas they use (if so, please explain providing as much detail as possible what changes are requested and why).
56	NPC	Hamlets	Land Use Designations	Some communities have said that while they want important areas protected, they might be prepared to consider development proposals if certain conditions were met. Can Hamlets identify what conditions should be met to let development proceed?
57	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.; All participants	Marine Areas	Would the signatories and participants support additional protections for marine wildlife and marine habitat, including sea ice caribou and community ice crossings, if Inuit hunting, community resupply, emergency response and national defense were permitted uses of all marine environments?
58	NPC	Government of Canada	Marine Shipping	Does the Government of Canada have a strategy for transportation in Nunavut's marine environment that the Commission should take into consideration in finalizing the Land Use Plan?
59	WWF	Government of Canada	Marine Shipping	Can the Government of Canada confirm if they would accept additional shipping restrictions in the first generation of the Plan above and beyond walrus and bird setbacks? And can the Government confirm if

#	From:	Directed To:	Topic:	Question:
				they would accept any icebreaking restrictions in this Plan, for example, along community travel routes or caribou sea ice crossings?
60	Joannie Ikkidluak, Kimmirut HTO	Ivujivik delegates	Marine Shipping	You were talking about the ships or cruise ships. On the walrus habitats and the disturbance issue, what actions have taken place? Has there been any advice given to have less impact on wildlife?
61	Abraham Kublu	All participants	Marine Shipping	Participants are invited to answer the following question from Abraham Kublu (Qikiqtani Hearing Transcript p. 63): "...My question is about the Northwest Passage since it is starting to be used more. There are more interested groups that would like to pass through this area. My question is on restriction. Can we provide a restriction so that they do not go through certain areas?"
62	NPC	All participants	Marine Shipping	Can participants suggest mechanisms by which the Land Use Plan can avoid conflicts between uses of the ice-covered marine environment with caribou migration, community uses and formal international agreements? For example, are there specific times, areas and corridors where temporary restrictions could be applied? More broadly, can participants suggest mechanisms that would ensure vessels respect the buffer and exclusion zones established by the Plan?
63	NPC	All participants	Marine Shipping	Cruise ships and associated activities, including real and potential disturbance to important wildlife habitats, are of increasing concern to many residents. Can participants suggest mitigation mechanisms that would ensure that such disturbances do not occur?
64	World Wildlife Fund	Government of Canada	Marine Shipping	Have you consulted with the Nunavut Marine Council to see if they are in agreement with your recommendation to remove all shipping restrictions in this draft of the Nunavut Land Use Plan? Similarly, have you consulted with the four members of the Nunavut Marine Council (NIRB, NWMB, NPC, NWB) to see if they are in agreement with your recommendation to remove all shipping restrictions in this draft of the Nunavut Land Use Plan?
65	NPC	Agnico Eagle; NWT & NU Chamber of Mines	Mineral Exploration & Development	What terms and conditions, if any, would participants recommend be applied if only one conformity determination is to be conducted at the outset of any mineral development?
66	S. Barnabus, Arctic Bay	NWT & NU Chamber of Mines	Mineral Exploration & Development	Our ancestors in the 1970s have created and worked with the maps. I have the photographs, so Inuit could benefit in terms of the mining industry, when the Industry started first coming up, especially in the <b>Nunasivik</b> area. This is so our younger generation can work, and potential mineral areas were identified including oil and gas, diamond, and other precious metals. Do you have any of this historical mapping?
67	NPC	Government of Canada; NWT & NU Chamber of Mines	Mineral Exploration & Development	Recognizing the signatories will be asked to approve or reject the DNLUP, what criteria, if any, do the signatories believe is necessary before a restriction on developing existing mineral claims could be proposed, or do the signatories take the position all mineral claims ought to be grandfathered?

#	From:	Directed To:	Topic:	Question:
68	NPC	NWT & NU Chamber of Mines; All participants	Mineral Exploration & Development	Recognizing the signatories will be asked to approve or reject the DNLUP and that the Land Use Plan cannot exempt a project from itself, do participants support recognizing existing uses as conforming uses in all land use designations subject to further conformity determinations if significant modifications are made, and if so, how should the Land Use Plan address projects that are developed in stages (or phases)?
69	Abraham Kublu	NWT & NU Chamber of Mines; Government of Nunavut	Mineral Exploration & Development	If the mine opens, would it be an open pit mine, or an underground mine? That is the first question. The latter question: if the mine closed and contamination occurred in Naujaat area, would the community be relocated?
70	Abraham Kublu	NWT & NU Chamber of Mines; North Arrow	Mineral Exploration & Development	Near Clyde River, I have not seen any mineral exploration near our communities. Will there be any activities near our area?
71	NPC	NWT & NU Chamber of Mines	Mineral Exploration & Development	Does the Chamber have an estimate on economic benefits Nunavummiut themselves receive in wages, benefits, services from the mining industry?
72	Qikiqtaaluk Wildlife Board	NWT & NU Chamber of Mines	Mineral Exploration & Development	If a company can prove adequate mineral reserves for profitable mine development based on only one-quarter of the data needed to prove most mine developments, should the mine be blocked because it is 'data deficient'?
73	NPC	All participants	Polar Bear Denning Areas	Polar bear dens are dispersed over large areas, occur in low densities and change locations over time. Do participants support the use of Special Management Areas for polar bear denning, and if so what specific conditions for those areas are proposed?
74	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.; All participants	Precautionary Principle	Many participants have provided further information to the Commission, and where information gaps remain, they have urged the Commission to apply the precautionary principle. How do participants propose the Nunavut Land Use Plan define and implement the precautionary principle, recognizing the weight the Commission gives to traditional knowledge and IQ?
75	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.; All participants	Precautionary Principle	Participants including the NIRB and NWMB recommend using the precautionary principle in the Land Use Plan and the NWMB's submissions ask the NPC to use protected areas to protect caribou. Under what circumstances would the signatories say this application of the precautionary principle is appropriate?

#	From:	Directed To:	Topic:	Question:
76	NPC	All participants	Process	A number of organizations have recommended that NPC be more explicit with regard to the periodic Plan review, given that this would be a “first-generation land use plan”. Can participants suggest mechanisms which would address the need for clarity and certainty when it comes to the periodic review?
77	NPC	All participants	Process	Can participants recommend specific research topics and themes that should be addressed to fill important gaps in knowledge?
78	BQCMB	KWB, Kivalliq HTOs and Hamlets	Process	Do people know that after the first Nunavut land use plan is approved it can be reviewed periodically and changed? Do people know that communities and other parties can recommend amendments to the land use plan if there is major project like a road that they want to see developed but is not allowed by the first Plan?
79	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.; All participants	Purpose of Plan	Under what circumstances if any do participants suggest the Land Use Plan require the NPC to issue a negative conformity determination rejecting a project rather than a positive conformity determination for further consideration by the NIRB and other regulators?
80	NPC	Government of Canada; Government of Nunavut; Nunavut Tunngavik Inc.; All participants	Purpose of Plan	If any participants take the position the Land Use Plan should not allow the NPC to issue negative conformity determinations, please identify what laws are already in place that have the same purpose and effect as the proposed land use designations and how those laws conflict with the operation of the Land Use Plan.
81	David Kunuk, GN	Kimmirut Community Delegates	Resource Development	I would like to ask a question to the members who have presented. Have they had discussions about quarrying sites or if there were any mineral and oil/gas development - if there is a potential? Have you had discussions on those?
82	Ali Qavavauq, Ivujivik	Government of Canada	Waste Sites	When we were in Kuujuaq, I did mention if photographs were taken of the Nottingham Island cleanup. I want to see any pictures of the cleanup taken.
83	Resolute	Government of Canada	Waste Sites	Can we have confirmation that some of the area will be cleaned up? Who exactly is responsible to confirm this with us that it’s going to happen?
84	Joshua Kango, Iqaluit HTO	All participants	Waste Sites	Participants are invited to answer the following question from Joshua Kango, Iqaluit HTO (Qikiqtani Hearing Transcript p. 56): "The garbage that has been buried from the past, we think these buried contaminants are dangerous, even as far as Resolute Bay. There are a lot of old vehicles that are just abandoned and buried over. Who will be responsible for this cleanups identified?"
85	NPC	All participants	Waste Sites	What criteria do participants recommend the NPC apply when it is prioritizing the clean-up of contaminated sites?
