February 4, 2014

To whom it may concern:

The Fort Smith Métis People support the protection of the calving and post calving areas. If exploration and development were allowed in these calving areas this would add extreme pressure to the caribou in the last and most important area, the calving area which remain undisturbed at present. As caribou return to the same area to birth their young we need to protect these areas and not develop them, for the future of the caribou and those who depend on them to survive.

Sincerely,

Ken Hudson
President, Fort Smith Métis Council
