

### Kivalliq Wildlife Board Annual General Meeting 28 Oct 2013

**WHEREAS** the Kivalliq Wildlife Board (KWB) is a forum for community discussion and is a regional wildlife organization that has responsibilities of wildlife management in the Kivalliq region as identified in the Nunavut Land Claims Agreement;

**WHEREAS** Inuit Qauyimayatuqangit and scientific information indicate that disturbance of caribou calving and postcalving grounds by exploration and development activity will cause detrimental and long-term impacts to caribou populations;

**WHEREAS** caribou are a vital subsistence resource to Inuit and should not be compromised by the short-term benefits of non-renewable resource extraction and mineral exploration activity on calving and post calving grounds;

### THEREFORE be it resolved

"That the KWB strongly opposes any form of exploration and/or development within the Kivalliq caribou calving and post-calving grounds, and that a second letter will be written to all stakeholders and Nunavut wildlife management organizations indicating this.
