Aug. 13/07	Dionne Filiatrault	NWB	Talked briefly about letter sent out on Aug. 9 th . She introduced me to David Hohnstein (lead Technical guy). Dionne is very interested in a more collaborative working relationship. They are under pressure from the GN to coordinate and streamline regulatory processes with other IPGs. INAC promised her funding to hold a workshop to do so. They did an internal assessment (confidential) of regulatory activities in Nunavut. The report was scathing of all agencies, them included. They want to work together and feel the IPGs need to stand together on issues and help each other out. They are also having GN issues.
