Some of the key issues in the 2016 Draft Nunavut Land Use Plan to be discussed

- Your views on how the 2016 Draft Plan proposed to manage land use in important areas such as:
  - Caribou calving areas, post-calving areas, freshwater crossings, and sea ice crossings
  - Key migratory bird habitat sites near your community
  - Community on-ice travel routes
  - Coppermine River

- Should some uses not be allowed in these areas, or are there other ways that they can be managed?

- Have the areas been identified correctly?

- How economic opportunities including existing mineral rights and proposed roads could be affected by the land use plan.

- Are there other areas so important to your community that the land use plan should tell others how they should be used?
