TITLE: An investigation of the sensitivity of high Arctic permafrost to climate change

OBJECTIVES OF RESEARCH:

The information collected in this study will improve our general understanding about climate and permafrost as well as help to predict how the land will respond as climates warm. This study also contributes new information about high Arctic permafrost and ground ice conditions, the sensitivity of high arctic permafrost to climate change and background data upon which landscape changes can be documented.

TERMS & CONDITIONS:

The holder of this licence will be bound by the terms and conditions from the Nunavut Impact Review Board Screening Decision Report and per the Department of Culture & Heritage Archeological Sites terms and conditions. These terms and conditions will form part of this licence

DATA COLLECTION IN NU:

DATES: July 01, 2016-August 30, 2016

LOCATION: Ellesmere Island, Axel Heiberg Island

Scientific Research License 02 023 16R-M expires on December 31, 2016

Issued at Iqaluit, NU on March 01, 2015
